

[STARTBUTTON API DOC](#) > [SERVER-TO-SERVER INTEGRATION](#) >
[S2S INTEGRATION FOR MOBILE MONEY](#)

 Copy 

S2S MoMo (RWF)

Initiate S2S

Authorization

Set to Bearer PUBLIC_KEY

Content-Type

Set value to `application/json`

 The public key can be gotten from the 'Settings' page on your Startbutton dashboard.

Post a request to the URL below, where the base URL is determined by the environment you are in.

> BaseUrls

Endpoint

POST `{{baseurl}}/transaction/initialize/s2s/mobile_money`

Sample code:

Required parameters

To simulate a failed sc...

Optional param...

```
{
  "provider": "MTN",
  "phone": "250123123123",
  "amount": 2000,
  "email": "RWF-momo-test@customer.com",
  "currency": "RWF"
}
```

 We support only two Mobile money providers: MTN & Airtel and as the case may be, you are expected to pass any of the 2 as the provider.

Sample response:

Success

Failed response

```
{
  "success": true,
  "message": "Payment Request Successful",
  "data": {
    "reference": "a76b2d362692",
    "nextStep": "PIN"
  }
}
```
