

Bank List

The bank list endpoint helps merchants retrieve the list of banks for countries supported for transfer (NGN, GHS, ZAR and KES).

Authentication

Authorization

Set to Bearer SECRET_KEY

Content-Type

Set value to `application/json`

 The secret key can be gotten from the 'Settings' page on your Startbutton dashboard.

Post a request to the URL below, where the base URL is determined by the environment you are in.

> BaseUrls

Endpoint

GET `{{baseurl}}/bank/list/:currency?
type=:type&countryCode=:countryCode`

Here are sample requests below.

Param	Param Type	Required	Description
currency	URL	Yes	Allowed values NGN, GHS, ZAR, KES, UGX, RWF, TZS, and ZMW
type	Query	No	Allowed values <code>bank</code> and <code>mobile_money</code> defaults to <code>bank</code>
countryCode	Query	Yes (Only for XOF) Used to get the banklist for other XOF countries aside from Côte d'Ivoire (which is the default)	Allowed values: <code>BJ</code> for Benin, <code>CI</code> for Cote d'Ivoire, <code>TG</code> for Togo, <code>SN</code> for Senegal, <code>ML</code> for Mali, <code>BF</code> for Burkina Faso, <code>CM</code> for Camerouns to <code>Côte d'Ivoire</code>

 To see supported payment channel for these currencies check [here](#).

Here is a sample response

```
{
  "success": true,
  "message": "Bank list retrieved",
  "data": [
    {
      "name": "9mobile 9Payment Service Bank",
      "code": "120001",
      "id": 302
    },
    {
      "name": "Abbey Mortgage Bank",
      "code": "404",
      "id": 174
    },
    ...
  ]
}
```

Account Name Verification

This endpoint enables merchant verify the identity of the receiver of the transfer, it's recommended that the account name of the recipient is verified before a transfer is done. This is currently available for NGN and GHS only.

Authorization

Set to Bearer SECRET_KEY

Content-Type

Set value to `application/json`

 For MoMo pass the `msisdn` as accountNumber in your request.

Endpoint

GET `{{baseUrl}}/bank/verify?`

`bankCode=000&accountNumber=6170***&countryCode=GH`

 We don't support account validation for any other currency asides GHS and NGN.

 `countryCode` for Ghana is `GH` and not ~~GHS~~
`countryCode` for Nigera is `NGN`

Here is a sample response:

Successful

Failed

```
{
  "success": true,
  "message": "successful",
  "data": {
    "account_number": "20090000000",
    "account_name": "JOHN DOE",
    "bank_id": 0
  }
}
```
