Get Wallet Balance

With a single endpoint, you can get the wallet balances for all collection currencies enabled for your account.

Authorization	Set value to `Bearer SECRET_KEY`
Content-type	Set value to `application/json`

> BaseUrls

Endpoint	
GET `{{baseurl}}/wallet`	

Once a call is initiated, we return your wallet balances across all currencies.

Sample response:

```json
{
    "success": true,
    "message": "Wallet",
    "data": [
        {
            "_id": "****b082****09cac****",
            "currency": "GHS",
