S2S Virtual account (GHS)

This payment method enables your customers pay-in by making transfers to the provided GHS VA provided, while ensuring you receive instant settlements.

Authorization	Set to Bearer PUBLIC_KEY
Content-type	Set value to `application/json`

> ℹ️ The public key can be gotten from the 'Settings' page on your Startbutton dashboard.

Post a request to the URL below, where the base URL is determined by the environment you are in.

> BaseUrls

Endpoint

POST: `{{baseurl}}/transaction/initialize-s2s`

Here is a sample request below:

```json
{
    "amount": 50000,
    "currency": "GHS",
    "email": "test-pms@customer.com",
    "reference": "ref-102ssss"
}
```

ⓘ The amount should be in fractional units.

Here is a sample response:

```json
{
    "success": true,
    "message": "VA initiated",
    "data": {
        "accountNumber": "900xxxxxxxxxx",
        "expiryTime": "2024-09-06T11:57:32.082Z",
        "reference": "4fxxxxxxxxx",
        "bankName": "StartButton Bank",
        "accountName": "StartButton Merchant",
        "shortCode": "shc-jqzv2ktl2f"
    }
}
```
